(54) Titre : DISPOSITIF DE TRANSFERT DE PELLICULE
(54) Title: DEVICE FOR TRANSFERRING FILM

(57) Abrégé/Abstract:

A coating film transfer tool having a construction to be used like a writing tool in a so-called lateral pulling use. The front end pressurizing part of the coating film transfer head is constituted so as to guide the coating film transfer tape almost oppositely to the gripping surfaces of the case, and the user holds the case main body in a position like a writing tool, and moves the case in the lateral direction on the sheet of paper, while pressing the coating film transfer tape tightly to the sheet of paper by the front end pressurizing part of the head, so that the coating films such as corrective paint layer and adhesive layer on the coating film transfer tape are transferred onto the sheet of paper.
